

Appendix
(Showing How Claims
Have Been Amended)

1. (Twice Amended) A system for interactive wagering, comprising:

a database that stores data relating to a plurality of wagering accounts
[wagering account information]; and

a plurality of types of user interface systems, that receive [the] data
relating to a single wagering account [wager account information] stored in the database, that
receive wager information from a user[s], and that provide the ^{the} data relating to a single wagering
account [wager account information] received to the user[s], wherein at least one of the plurality
of types of user interface systems is an interactive voice response control system that receives a
telephone call from an external source, that provides, to the external source through the
telephone call, voice prompts that correspond to the data relating to the single wagering account
[wager account information], and that receives wager information from the external source
through the telephone call, and wherein at least another of the plurality of types of user interface
systems is a computer wagering control system that provides the data relating to the single
wagering account [wager account information] to an external computer and that receives wager
information from the external computer through the Internet.

2. (Amended) The system of claim 1, wherein the plurality of types of user
interface systems comprises:

a television wagering control system that provides the data relating to the
single wagering account [wager account information] to a television distribution system.

13. (Amended) The system of claim 1, wherein the plurality of types of user interface systems comprises:

a computer wagering control system that provides the data relating to the single wagering account [wager account information] to an external computer and that receives wager information from the external computer.

14. (Amended) The system of claim 13, wherein the computer wagering control system provides the data relating to the single wagering account [wager account information] to the external computer and receives the wager information from the external computer, through an Internet connection to the external computer.

15. (Twice Amended) The system of claim 13, wherein the computer wagering control system provides the data relating to the single wagering account [wager account information] to the external computer and receives the wager information from the external computer, through a telephone connection to the external computer.

16. (Twice Amended) The system of claim 1, wherein the computer wagering control system provides the data relating to the single wagering account [wager account information] to the external computer and receives the wager information from the external computer through a wireless connection to the external computer.

17. (Twice Amended) A method for interactive wagering, comprising:

storing data relating to a plurality of wagering accounts [wager account information] in a database; and

receiving wager information from a user[s] and providing [the] data relating to a single wagering account [wager account information] to the user[s], [both] using a plurality of types of user interface systems, further comprising receiving a telephone call from an external source, providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and receiving wager information from the external source through the telephone call, and further comprising providing the data relating to the single wagering account [wager account information] to an external computer and receiving wager information from the external computer through the Internet.

18. (Amended) The method of claim 17, further comprising[:]

providing the data relating to the single wagering account [wager account information] to a television distribution system; and

receiving the wager information from a television wagering terminal[:].

23. (Amended) The method of claim 18, wherein the providing the data relating to the single wagering account [wager account information] to the television distribution system and the receiving wager information from the television wagering terminal further comprises receiving the wager information from the television wagering terminal via a telephone system connection.

24. (Amended) The method of claim 18, wherein the providing the data relating to the single wagering account [wager account information] to the television distribution system and the receiving wager information from the television wagering terminal further comprises receiving wager information from the television wagering terminal via a cable system connection.

25. (Amended) The method of claim 18, wherein the providing the data relating to the single wagering account [wager account information] to the television distribution system and the receiving wager information from the television wagering terminal further comprises receiving the wager information from the television wagering terminal via a computer network connection.

27. (Twice Amended) The method of claim 17, wherein [the receiving the telephone call from the external source, the providing, to the external source through the telephone call, the voice prompts that correspond to the data relating to the single wagering account [wager account information] and the receiving wager information from the external source through the telephone call further comprises receiving the wager information as signals generated in response to one or more telephone key depressions.

28. (Twice Amended) The method of claim 17, wherein the receiving the telephone call from the external source, the providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and the receiving wager information from the external source

through the telephone call further comprises receiving the wager information as verbal commands that are spoken by a caller.

31. (Twice Amended) The method of claim 17, wherein the providing the data relating to the single wagering account [wager account information] to the external computer and the receiving wager information from the external computer further comprises providing the data relating to the single wagering account [wager account information] to the external computer and receiving the wager information from the external computer, through a telephone connection to the external computer.

32. (Twice Amended) The method of claim 17, wherein the providing the data relating to the single wagering account [wager account information] to the external computer and the receiving wager information from the external computer further comprises providing the data relating to the single wagering account [wager account information] to the external computer and receiving the wager information from the external computer, through a wireless connection to the external computer.

33. (Twice Amended) A computer-readable medium encoded with machine-readable instructions for providing information in an interactive wagering system, the machine-readable instructions comprising:

storing data relating to a plurality of wagering accounts [wager account information] in a database; and

receiving wager information from a user[s], and providing [the] data relating to a single wagering account received [wager account information] to the user[s], [both] using a plurality of types of user interface systems, further comprising receiving a telephone call from an external source, providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], receiving wager information from the external source through the telephone call, and further comprising providing the data relating to the single wagering account [wager account information] to an external computer and receiving wager information from the external computer through the Internet.

34. (Amended) The computer-readable medium of claim 33, wherein the plurality of types of user interface systems comprises:

a television wagering control system that provides the data relating to the single wagering account [wager account information] to a television distribution system and that receives the wager information from a television wagering terminal.

42. (Amended) The computer-readable medium of claim 33, wherein the receiving the telephone call from the external source, the providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and the receiving wager information from the external source through the telephone call further comprises receiving the wager information as signals generated in response to one or more telephone key depressions.

43. (Amended) The computer-readable medium of claim 33, wherein the receiving the telephone call from the external source, the providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and the receiving wager information from the external source through the telephone call further comprises receiving the wager information as verbal commands that are spoken by a caller.

44. (Amended) The computer-readable medium of claim 33, wherein the providing the data relating to the single wagering account [wager account information] to the external computer and the receiving wager information from the external computer further comprises providing the data relating to the single wagering account [wager account information] to the external computer and receiving the wager information from the external computer, through a telephone connection to the external computer.

45. (Amended) The computer-readable medium of claim 33, wherein the providing the data relating to the single wagering account [wager account information] to the external computer and the receiving wager information from the external computer further comprises providing the data relating to the single wagering account [wager account information] to the external computer and receiving the wager information from the external computer, through a wireless connection to the external computer.

46. (Twice Amended) A system for interactive wagering, the apparatus comprising:

means for storing data relating to data relating to a plurality of wagering accounts [wager account information] in a database; and

means for receiving wager information from user[s], and providing data relating to a single wagering account received [the wager account information] to the user[s], both using a plurality of types of user interface systems, further comprising receiving a telephone call from an external source, providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and receiving wager information from the external source through the telephone call, and further comprising providing the data relating to the single wagering account [wager account information] to an external computer and receiving wager information from the external computer through the Internet.

47. (Amended) The system of claim 46, wherein the plurality of types of user interface systems comprises:

a television wagering control system that provides the data relating to the single wagering account [wager account information] to a television distribution system and that receives the wager information from a television wagering terminal.

55. (Amended) The system of claim 46, wherein the receiving the telephone call from the external source, the providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and the receiving wager information from the external source through the

telephone call further comprises receiving the wager information as signals generated in response to one or more telephone key depressions.

56. (Amended) The system of claim 46, wherein the receiving the telephone call from the external source, the providing, to the external source through the telephone call, voice prompts that correspond to the data relating to the single wagering account [wager account information], and the receiving wager information from the external source through the telephone call further comprises receiving the wager information as verbal commands that are spoken by a caller.

57. (Amended) The system of claim 46, wherein the providing the data relating to the single wagering account [wager account information] to the external computer and the receiving wager information from the external computer further comprises providing the data relating to the single wagering account [wager account information] to the external computer and receiving the wager information from the external computer, through a telephone connection to the external computer.

58. (Amended) The system of claim 46, wherein the providing the data relating to the single wagering account [wager account information] to the external computer and the receiving wager information from the external computer further comprises providing the data relating to the single wagering account [wager account information] to the external computer and receiving the wager information from the external computer, through a wireless connection to the external computer.
